

Orgroam does not recognize nodes

DONE Orgroam does not recognize nodes

Fixing org-roam issue that sometimes does not recognize some nodes

Check-out: roam config

- **Fix:** adding org_files to roam config

```
require("org-roam").setup({
  directory = base_dir,
  org_files = { base_dir .. "/topics/**/*.*org" },
  extensions = { dailies = { directory = zettel_dir .. "/" .. ".daily"
    ↵ } },
  database = {
    path = vim.fn.expand("~/roamdb.json"),
    persist = true,
    update_on_save = false,
  },
  ui = {
    node_buffer = {
      show_keybindings = false,
      focus_on_toggle = false,
      highlight_previews = true,
    },
  },
  templates = capture.roam,
})
```
